Attach a map of your project showing the point of diversion/withdrawal and place of use. If platted property, be sure to include a complete copy of the plat map.

#### Section 5. WATER SYSTEM DESCRIPTION

Describe your proposed water system (include type and size of devices used to divert or withdraw water from source):

Spanaway Water Company is a Group A, municipal water supply system that holds thirteen (13) additive water rights and one non-additive water right that withdraw water from eleven (11) groundwater wells located within the Chambers-Clover Creek Watershed (WRIA 12). Spanaway has a total authorized additive annual quantity (Qa) of 4,067.5 afy and a total additive instantaneous quantity (Qi) of 11,007 gpm. As noted in the (attached) self-assessment, several of the Spanaway's additive water rights also include non-additive quantities. All of the water rights held by Spanaway are designated for municipal purposes. The non-additive water quantities requested under this water right application would be withdrawn from Spanaway's existing well sources, or potentially replacement/additional wells developed pursuant to RCW 90.44.100(3).
